Re: Touchwood Investments  
[REDACTED]

I purchased a home under construction in November 2005 from Touchwood Investments and moved in March 2006. I have been completely satisfied with my lovely home and would not hesitate to purchase another home from such a top quality builder if tempted!

Victoria and Slavko were excellent in their suggestions and direction and especially regarding my changes and upgrades during the building process. In spite of Calgary's challenging construction situation, winter weather and my upgrades, my home was even ready on time!

Watching other homes being built in this neighborhood and the challenges some of my friends have encountered with the custom home building process have continuously reinforced that it was my good fortune to have selected a Touchwood built home. For the few small touch-ups that I needed after possession, Slavko had his team immediately back on site, again completely top quality service and care!
